- 31-33 Product Guide & Measurements

Thank you for showing an interest in our natural Portuguese limestone collection. As you browse through this catalogue you will find a very comprehensive range with over 31 models being shown, most being offered in various sizes. There are styles to suit almost any room from Traditional to Contemporary, including our award winning designs. Our fireplaces are manufactured in our Portuguese factory to the highest standard using only the best available materials with each stage of manufacture being monitored with our own strict quality control system.

You will note our attention to detail as we ensure the veining of our stone generally always runs from left to right at varying angles to each fireplace part which looks extremely attractive. We never mix general horizontal with general vertical veining to each fireplace part as this in our opinion gives a very inferior product. If however your preference is for mixed horizontal and vertical veining, all of our designs are available in Sepol Portuguese Limestone as an alternative. Sepol is a unique & beautiful Portuguese limestone only available exclusively from Newman Fireplaces Ltd & our sister company New Image Fireplaces Ltd. See p12 for example.

Portuguese limestone is a beautiful natural material offering a fireplace that is truly unique each having its own natural variation in shading and markings. With its neutral colour it is an ideal choice for making decorating and room furnishings simple for now and for the future.

We supply only to fireplace retail specialists within the UK. This has the advantage of viewing some of our products usually within close proximity to where you live. Also the dealer can offer professional advice and surveys for your chosen product giving you total peace of mind, a very important part of any fireplace purchase.

We hope you enjoy this brochure and we are confident that you will agree that our fireplaces would be a true focal point to any room giving, class, warmth and lasting beauty which can be admired for many years to come.

PRODUCT GUIDE

All of our stone collection is manufactured from natural Portuguese limestone and as such, natural variation will occur. This will include shading, veining, fossils and crystal markings. This is the beauty of a natural stone product which sets it apart from any mass produced man made counterpart.

Every effort has been made to show correct colour representation, although no guarantees can be given due to the printing process. Customers are advised to view fireplaces and samples at their fireplace dealer.

All of our fireplace range is recommended for most compatible gas flues and electric fires. Ask your fireplace dealer for advice. Newman Fireplaces Ltd Policy is one of continuing improvement, we therefore reserve the right to alter material, design and specification without prior notice.

It is strongly recommended that your chosen fireplace dealer surveys your chimney and any relevant items before purchasing any of our products.

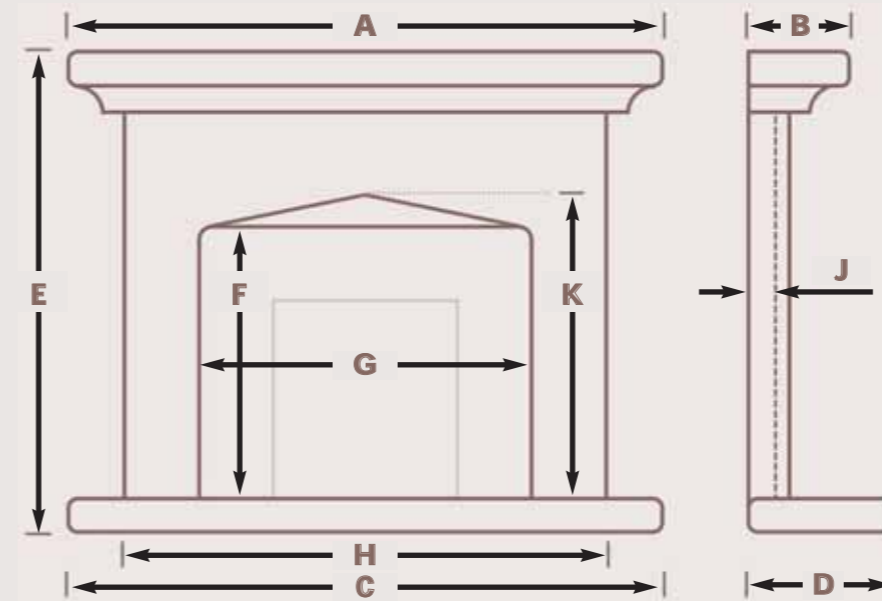

It is advised that when the fireplace has fully dried after installation, that all surfaces are sealed with a suitable stone sealer. Ask your fireplace dealer for advice.

All Newman products should be inspected before installation, for quality and damage. No refunds can be given after this event.

All of our products must be installed by competent and experienced installers complying with all relevant building regulations and any rules in force.

MEASUREMENTS

All of our fireplaces in this brochure are hand made and hence all measurements are approximate and may vary slightly.

MODEL TYPE: **S** - SOLID **B** - BOXED **SB** - COMBINATION SOLID AND BOXED
