

Award Winning Designs

NEW IMAGE RANGE

NEWMAN FIREPLACES LTD

Limestone,
Sandstone
& Marble
Collection

Thank you for showing an interest in our Portuguese limestone and marble collection.

As you browse through this catalogue you will find a very comprehensive range with most designs available in different sizes. There are styles to suit almost any room from traditional to contemporary including many designs that have been created from our in-house design team enabling us to offer many truly unique designs that are full of style. We carefully select our stone and marble for the very best available quality and ensure our fireplaces are manufactured to the highest standards using both modern and traditional methods.

We only supply fireplace retailers within the UK that should be able to offer you advice and in-house surveys for your chosen product, a very important part of any fireplace purchase.

Portuguese Limestone

Our Sepol Portuguese Limestone is available exclusively to Newman Fireplaces Ltd. This limestone has its own unique character with a neutral background colour and very warm to the eye veining, a truly beautiful limestone that should suit most room decor for now and for the future.

Natural Marble

Natural marble is a wonderful material making each fireplace truly unique. Unlike micro agglomerate marble, no two fireplaces will look the same as each fireplace will contain its own colour shading, veining and markings. If individuality is what you desire then this is the product.

Micro-agglomerate Marble

A man made product made from 95% crushed natural marble with binding agents. This material offers very consistent quality with a homogenous structure. The new generation of materials shown in this brochure offer a realistic marble pattern usually at a lower cost than its natural marble counterpart.

We hope you enjoy this brochure and we are confident that you will agree that our fireplaces would be a true focal point to any room giving class, warmth and lasting beauty that can be admired for many years to come.

All dimensions in this brochure are approximate and are in mm.

Product Guide

All of our natural marble and limestone collection is manufactured from natural materials and as such, natural variation will occur. This will include shading, veining, fossils and crystal markings. This is the beauty of natural marble and limestone and sets it apart from any mass produced man made counterpart.

Micro agglomerate marble is far more consistent for regular shading and markings, with usually only small variations between each fireplace.

Every effort has been made to show correct colour representation, although no guarantees can be given due to the printing process. Customers are advised to view fireplaces and samples at their fireplace dealer.

All of our fireplace range is recommended for most compatible gas fires and electric fires. Ask your fireplace dealer for advice. Newman Fireplaces Ltd Policy is one of continuing improvement, we therefore reserve the right to alter material, design and specification without prior notice.

It is strongly recommended that your chosen fireplace dealer surveys your chimney and any relevant items before purchasing any of our products.

All New Image products should be inspected before installation, for quality and damage. No refunds can be given after this event.

All of our products must be installed by competent and experienced installers complying with all relevant building regulations and any rules in force.

The printed swatch samples should give an approximate guide to colours but we recommend you see actual samples from your fireplace retailer as there may be some discrepancies due to the printing process. The Sepol Natural Portuguese Limestone, the Estremoz and the Creme Marfil marble are natural materials and as such natural variation may occur.
