# THE GALLERY COLLECTION

## WELCOME TO THE GALLERY COLLECTION

The Gallery Collection presents an extensive range of traditional and contemporary fireplaces, combining supreme craftsmanship, quality materials and elegance in design.

Our desire is to provide you with a superb choice of fireplaces skillfully made with high quality materials, all fitted in your home by reputable retailers so you can enjoy the experience of buying and owning your individual fireplace.

Featured in this brochure is a range of efficient cast iron stoves. The Firefox and the Tiger families in all their variations offer a compact range of sizes and options for gas or solid fuel burning.

The brochure chapters are then arranged by style of Firebasket available, from contemporary to the more traditional. We pride ourselves on the breadth and variety of choice of our products and are confident there is something to suit all tastes and budgets.

Each Firebasket is shown with a mantel and slip set or cast iron fascia, with mantel surround and hearth options given in the text below each fireplace pictured. In many cases a chamber lining is used to finish off the look.

Please check the selection grid at the back of this **STOVES & FIREBASKETS** brochure or ask your retailer to help determine what products suit your particular circumstances. If your preferred combination of products is not shown, it does not mean they do not work together. There are many thousands of permutations and we are sure one of these will suit your taste.

## BASKET SIZES KEY

## NOTES

- \* High definition log set available for these baskets
- All products are suitable for burning solid fuel, however polished and highlighted products may tarnish. Only burn small fires to start with in order to temper the cast iron.
- Before committing to a fireplace, please discuss your particular installation with your retailer who will provide expert advice and carry out a survey.
- All dimensions are provided as a guide only and are subject to a tolerance of  $\pm 12$ mm.
- Most fires have a remote control option, please ask your retailer.

Real stone has long been a distinctive material for fireplace mantels. As these are natural products each one will be unique, please visit your local Gallery retailer to see samples of the real thing. For dimensions please refer to the table below.

AGEAN LIMESTONE    CARRARA MARBLE    OAK    PINE    CAST IRON

## Understanding your new gallery fireplace.

### CAST IRON

All the cast iron products are delivered with a protective, oil-based coating on polished surfaces. This should be cleaned off during installation. It

is recommended that a spray-type oil is applied from time to time in order to avoid surface rust appearing. Ensure that the room in which the cast iron product is being installed is thoroughly dry. For example recently plastered walls cause high levels of moisture in the atmosphere and, as a result, rust is likely to occur.

**Under no circumstances should a water-based cleaner or polish be used to clean cast iron products.**

When using ceramic fuel, ensure that these do not touch any of the polished surfaces as this will help to minimise the possibility of thermal discolouration.

High temperature paint is used on the black and graphite products where fires will burn. This paint will eventually burn off. A proprietary, high temperature paint can be used to recoat your fireplace. Such paint is available from your retailer. It's your responsibility to burn smoke free fuels if you live in a smoke free zone.

There are some very high temperature burning fuels which can cause damage to any fireplace. Please refer to the Solid Fuel Association ([www.solidfuel.co.uk](http://www.solidfuel.co.uk)) recommendations and use an approved coal merchant as your supplier. No responsibility can be accepted if high temperature fuels have been used or if there is excessive draft. If in doubt we recommend the use of a clay fire back.

Clean ash away regularly as a build up beneath the fire will cause the grate to burn out quickly. The grate is a consumable part of your fire and will need replacement from time to time, depending on the frequency and burning temperature of your fires.

### GAS FIRES

A gas fire is a technical piece of equipment and, just like a gas boiler needs regular servicing. Please ensure that you have your gas fire serviced regularly by a

CORGI (Board Gais in ROI) registered installer.

### LIMESTONE

Limestone products, once installed and dry should be cleaned and re-sealed where necessary using Gallery Collection aftercare

products. All our limestone products are delivered pre-sealed in order to minimise any marks created during fitting. Your installer should carry out the initial sealing where applicable. Further sealing should not be necessary.

The stone mantels pictured are manufactured from 100% natural material. As such the mantel you will purchase will be unique due to the inevitable variations in fossil formation, veining and colour. This is one of the great attractions of 100% pure natural products. Please be aware that small fossils and variations in the limestone are part and parcel of this wonderful natural product.

### MARBLE

Marble products may have small amounts of colour-matched filler to give the impression of a continuous surface.

The nature of marble is such that when it is formed in the earth, some small cracks are created too. The marble that is selected for the mantels shown in this brochure has been chosen to provide affordable quality, thus some minor cracks have been permitted. To achieve a perfect piece of marble with no imperfections at all means a huge amount of wastage. This has two principal effects, the product becomes prohibitively expensive and the natural resources are depleted too quickly - a much more harmful approach to the world's environment.

## General information

- The colours shown in the brochures are as accurate as possible, but if the colour you require is critical then please consult your retailer before basing all your decisions on the colours shown here.
- Please also note that shading and crazing are characteristics of the glazed tiles used in tiled inserts and tiled hearths.
- There are occasions when designs, or products are altered or discontinued without prior notice (a reserved right), so if you are about to set your heart on a particular fireplace, please consult your retailer before making that final commitment
- All installations must be carried out in accordance with the requirements set out in the Building Regulation documents, in particular, Approved Document J. There are independent bodies which have been approved to carry out installations in accordance with these regulations.

**For gas installations the most recognised independent body is CORGI (Board Gais in ROI) and for solid fuel installations it is HETAS.**

Please confirm with your retailer that your new fireplace will be installed appropriately. If you have your new fireplace fitted by a CORGI (Board Gais in ROI) or HETAS registered fitter you will be given a certificate stating that your installation has been carried out in accordance with the Building Regulations. If you do not have one of these certificates then you will have to arrange for your local Building Control Officer to inspect your installation and approve it.

## STOVE OUTPUT INFO

Firefox 5	400	355	575
Firefox 8	545	360	595
Firefox 12	655	415	680

**All Gallery stoves are manufactured from cast iron, therefore it is vital that appliances undergo a period of 'burning in', this involves small fires initially, gradually increasing in size with each firing, if this process is adhered to, you should experience years of trouble free, enjoyable use.**

All Gallery stoves are CE approved to EN13240 and are suitable for use with wood, coal, coke, peat, anthracite or smokeless fuels.

Each stove has a riddling grate mechanism to ease de-ashing. Please ensure that all ash is removed from your solid fuel stove (once cooled) on a regular basis, it is important that a build up of ash is not allowed to occur as this will affect the life of the consumable parts within the burning chamber.

All Gallery solid fuel stoves can be top or rear flue exit, gas stoves are top exit only.

Gallery solid fuel stoves, in use, become very hot and therefore, all are supplied with a heat resistant mitten for safety.

Gallery gas stoves utilize an 'air wash' system which helps to keep the large viewing glass clean during operation and improve efficiency.

All gallery stoves are supplied with detailed, comprehensive installation & user instructions. It is critical that ALL installations conform to relevant Building Regulations and should be carried out by a qualified CORGI registered installer when fitting a gas stove, or a HETAS qualified engineer when installing for use with solid fuel. Failure to comply with these requirements may reduce the efficiency & serviceability of your appliance and will invalidate any guarantee. It is essential that prior to any installation, a relevant qualified engineer verifies the proposed site, location and conditions are suitable for the stove selected.

### PLEASE NOTE

- Your Gallery fireplace is made up of a number of different components and it is important to ensure that your installer has the necessary qualifications and experience to fit ALL the components of a fireplace.

- Variations in colour, veining and fossil formation in natural products are not considered defects, however in the unlikely event that there is a defect in any of the products shown in this brochure, then a replacement will be supplied without hesitation. Of course, this requires the products to be fully inspected prior to installation

as no responsibility for re-fitting or redecoration can be accepted if defective products have been installed. In this case and in the case of accidental damage after installation, in-situ repairs can be made by specialists, subject to prior agreement of terms with your retailer.

# THE GALLERY COLLECTION

Original Gallery Collection products are  (anti copying in design) registered, and are therefore protected by UK design right. We will not compromise on quality, neither should you, so in order for you to receive products manufactured to the highest possible standards, insist only on a genuine Gallery Collection Fireplace.
