FLAVEL

Makes anywhere feel like home

CHOOSING YOUR FLAVEL ELECTRIC FIRE

There is no more versatile fuel for home heating than electricity.

With a choice ranging from highly chic wall mounted 'hang-on-the-wall' fires, to Flavel's classically designed range of suites, there is a design to suit any home. And best of all you are free to enjoy any of these fantastic heating appliances in any room in your home simply by plugging into the nearest mains socket.

A Flavel electric fire is a welcoming focal point all year round. Every fire in the range has a 'flame picture' only setting. Unlike gas or solid fuel fires, this allows you to enjoy an atmospheric glow even when it is too warm to turn on the heat.

If you would like to learn more about the many benefits of owning a Flavel electric fire please sit back and take a few minutes to look through the fantastic range of appliances.

We are confident you are getting a product that is built to last

That's why we offer a 2 Year Guarantee on all Flavel electric fires*.

*Excludes fire surrounds and cabinets

CONTROL AT YOUR FINGERTIPS

Switch Control. Instant heat at the flick of a switch. Manual switches are cleverly concealed under the canopy and are easily accessible.

Remote Control. Imagine the luxury of remote control. Most Flavel electric fires can now be operated using a remote control, allowing you to sit back and have heat control at your fingertips.

Thermostatic Control. Every fire in our electric suite range comes with thermostatic control, allowing the heat to be set at your desired temperature.

Shown in Brass

ULTIFLAME TRADITIONAL

ultiflame

Ultiflame fires use innovative technology to create an ideal electric heating appliance that combines slim product depth with the appearance of an exceptionally deep fuel bed. The fascinating and highly realistic flame picture is created using LED projection technology to give the look of a full depth fire which can be viewed from any angle. They also benefit from a low power flame effect system that consumes 90% less energy than conventional electric fires when on the flame only setting.

Thermostatic control enables the heat temperature to be adjusted between 0.75kW and 1.5kW and the brightness of the fuel bed glow can be customised to suit any mood. Every model in this range can be operated by push buttons discretely hidden beneath the canopy of the fire or via an ergonomically designed remote control.

With an overall product depth of just 3" this fire can be fitted against a flat wall with any 3" rebated surround with no requirement for an additional spacer.

Contemporary Living

Flavel electric suites are free-standing complete units with no recess required, making them exceptionally easy to install. Simply place your beautifully designed fire suite in the desired position, fix to the wall using the brackets provided, and plug in to the mains electricity supply.

Each suite includes a glass fronted electric fire which has a variable heat output of up to 2kW, managed by a thermostatic control giving you the freedom to set the temperature to your desired level. A flame-effect-only setting ensures that the stunning log effect can be enhanced by the welcoming flame and under-bed glow even when there is no need for heat.

The Pollensa Suite includes all the benefits of the Valldemossa Suite but is slightly smaller in dimension for those who have smaller living areas.

SPECIFICATIONS

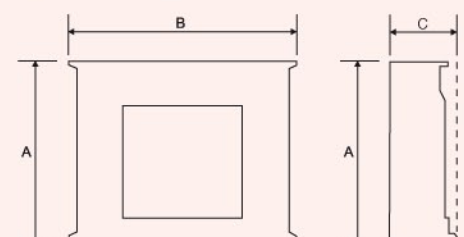

Safety – Thermal cut-out
 Type of heat – Convected
 Heat output – high 2kW
 Heat output – low 1kW
